Case of Financial and Taxation Services

Background: In July 2021, Brighture was engaged by a large state-owned enterprise in another province for tax consultation on transfer of properties acquired for account receivables. Through proper use of tax policies, Brighture helped the enterprise save 2.918 million Yuan of land value-added tax.

Service provided: Upon the engagement, Brighture collected the original data. Subject to article 7 of the Notice of the State Administration of Taxation on Issues concerning Settlement of Land VAT (SAT [2010] No. 220), and the first paragraph of Article 2 of the Notice of the State Administration of Taxation of the Ministry of Finance on Issues concerning land VAT (CAISHUI[2006] No. 21): "where a taxpayer transfers old houses and buildings and is unable to obtain the appraisal price but nevertheless can provide the purchase invoice, upon the confirmation by the local tax authorities, the amount of deduction items can be calculated according to the invoice amount with a 5% mark-up per year from the year of purchase to the year of transfer, subject to Item (1) and Item (3) of Article 6 of the Provisional Regulations of the People's Republic of China on Land Value-added Tax. When calculating deduction items, "each year" shall start from the date of purchase invoice, and each full 12 months shall be counted as one year, up to the date of sale invoice; for the period in excess of 6 months but less than 12 months, it shall be deemed one year.

This solution under the law successfully increased cost deduction to the amount of 5.358 million Yuan, thus reducing the land appreciation rate from 143.55% to 50.8%, and as a result, reduced the land VAT rate from 50% to 40%.

Friendly Reminder

VAT on transfer links, according to the Announcement (2016) No. 14, (B) General taxpayers transfer their immovable property built by themselves before April 30, 2016, Brighture chose the simplified tax calculation method, and took the total price and other expenses obtained as the sales, the tax payable is calculated as per the rate of 5%, thus avoided the general tax method of pre-levy rate of 5%, and saved 4 points of VAT.

The value of the existence of Brighture is truly for the sake of the enterprise to provide customized tax plan, and to make the boss feel at ease.

2. Fraud prevention and funds guarantee

With the popularization of electronic information technology, perpetrators take advantage of its convenience to carry out telecom fraud which is very difficult to prevent. At present, the commonly used new fraud methods mainly include: voice synthesis, AI face changing, forwarding of Wechat voice, and screening target people through AI technology, etc.

To prevent such frauds, we may take the following measures:

(1) Set more complex passwords and change them regularly;

(2) Install protection software for mobile phones and check and eliminate viruses regularly;

(3) Turn off balance payment and mobile payment functions at ordinary times if they are not used very often;

(4) Close the password-free small payment function;

(5) SMS verification is best enabled for large payments;

(6) Use e-banking security products such as digital certificate, payment shield, mobile phone dynamic password and so on;

(7) Regularly check transaction records, get prompt information of bank login, balance change, account setting and so on through customizing bank SMS service and reconciliation email;

(8) Keep carefully privacy information including ID card, bank card and mobile verification code in any circumstance;

(9) Do not frequently swipe mobile phone or root at will. Install software in regular channels;
